

Green House Gas & MACT Monitoring

RegPerfect® Light

- Complete Regulatory Solution
- Intuitive and Very Simple to Use
- Alarm Notifications and Acknowledgement
- Preconfigured Reports and Graphical Display
- Raid 1 Array with Hot Swappable Hard Drives
- Data Buffering
- Automated Data Backups
- User Configurable HMI
- Remote Support Capability

Teledyne Monitor Labs® (TML), the market leader in continuous emission monitoring is pleased to offer a comprehensive cost effective solution for monitoring, recording and reporting Continuous Parameter Monitoring System (CPMS) for compliance with 40CFR60, 40CFR63 and 40CFR98.

Our RegPerfect® Light software will interface with fuel flow metering, baghouse Dp, scrubber flow rate, ESP voltage, and other control device parameters. The software will directly interface with a communication module which includes data buffering.

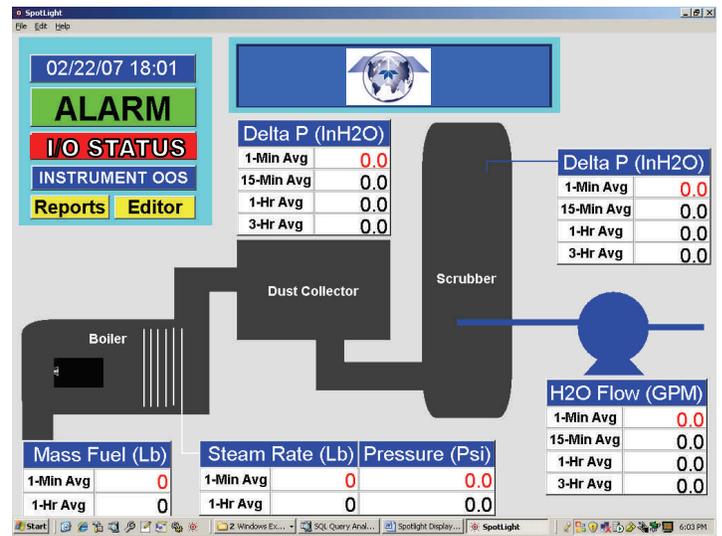

TML's RegPerfect Light CPMS DAS is server based and utilizes a suite of Microsoft Software including Windows Server, Office and SQL Server. The Raid 1 Server utilizes Quad core CPU technology, two hard drives, and DVD R/W drive. The CPMS DAS software comes preloaded and configured right out of the box to interface with continuous parameter monitoring; it can also be started up remotely which provides additional cost savings.

Continuous Parameter Monitoring Data Acquisition System

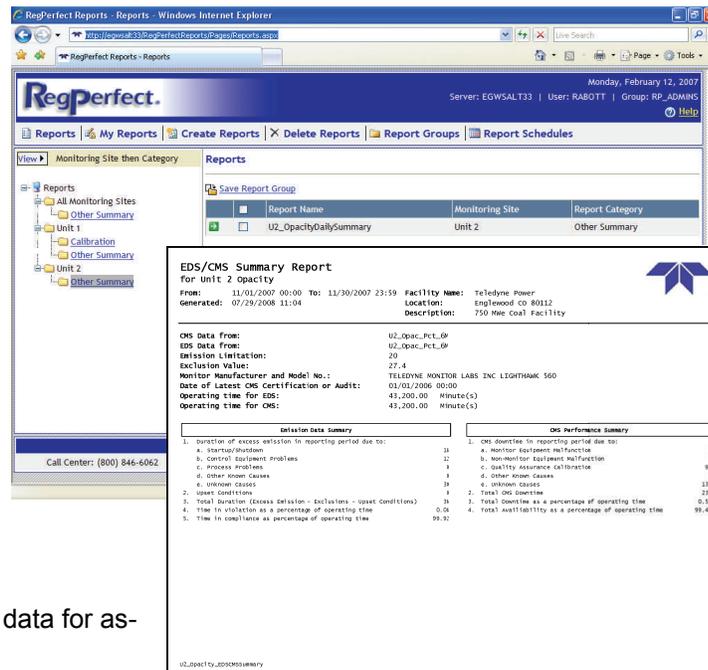

SpotLight

- Configured display that illustrates real time and calculated data
- Tool used to assist in maintaining compliance with operating permit requirements
- Configurable alarm application that notifies operator of compliance and system issues; includes email connectivity
- Assign reason/action codes for report submittals
- Edit constants, initiate calibrations, change instrument service status

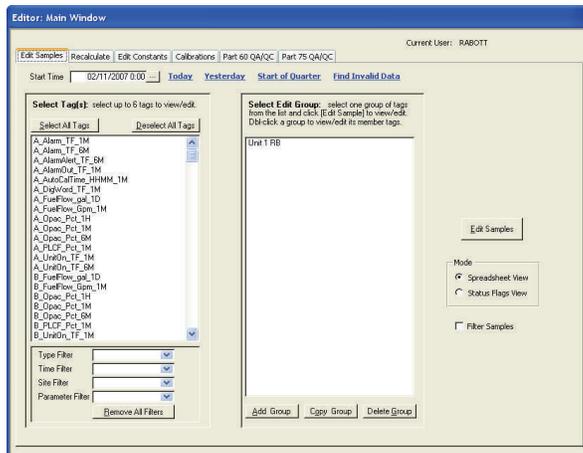

Reports

- Configured to comply with your operating permit recordkeeping and reporting requirements
- Create report groups to evaluate data quickly and efficiently
- Reports can be directed to any network printer or to an email address if DAS is connected to a mail server
- Browser based application that can be accessed through any PC with a browser
- Reports can be generated on demand or configured to automatically print and email

Editor

- Review, evaluate, edit, and recalculate data for assessing compliance
- Filter and create data groups to quickly and efficiently evaluate specific data
- View data in different formats for diagnosing problems
- Edit, sort and filter system constants quickly and efficiently
- Edit calibration reference values and reassess test results for daily and quarterly quality assurance
- Generate reports for daily and quarterly calibrations

RegPerfect® Light

Contact the TML Sales Team to ask about our DAS replacement program.
